

THE BLACKFIN RUNWAY VIDEO IS NOW ONLINE

YOU CAN AGAIN ENJOY SEEING THE 10 MODELS BY PRAMAOR THAT APPEARED ON THE RED CARPET AT MILANO MODA INTERNATIONAL FASHION SHOW

The June 22 appointment with Milano Moda International Fashion Show 2010 on Piazza della Scala was a magical evening for all the guests and for the numerous stylists and celebrities.

In addition to the excellent made in Italy eyewear presented on the runway by many Anfao associate companies, Blackfin also made its debut at the Show.

Now you can relive all the excitement of the Blackfin show on the Pramaor website or here below.

Blackfin sun models Vulcano, Sardinia, Cayman and Salina

feature a front piece made from a single sheet of pure titanium and ultra-slim beta titanium temples. Laser technology was used for marking, decorating and cutting the temples in a collection with a bold character and decisive, precise design. Elegant minimalist colors reflect the brand's refined spirit in combinations like black-gray, black-silver and white-silver. Vision models Guernsey, Shetland, Falkland, Jersey and Nelson caught the audience's eye because of the original combination of titanium and bright colors. In this series, Blackfin has again maintained its distinctive restrained elegance, but it also plays with particularly bold nuances like red, purple and green, or classical black, white and gold.
